"The believers in tariff reform did not abandon their faith when the high tariff doctrine was endorsed at the poils; neither did protectionists when their cause suffered loss. The advocates of the gold standard continued the fight for monometallism for twenty-five years in spite of the platform declarations of all parties in favor of a double standard. Shall we, who believe in bimetallism, lose courage because our opponents have profited by an increased volume of money—thus admitting the economic plea for which we have been contending?

The defenders of trusts did not lose heart when all parties denounced combinations in restraint of trade. Shall we give up the fight because monopoly has triumphed by stealth—must we now advocate an imperial policy because of our opponents having won a victory by denying that they are imperialists? A colonial system involves a surrender of our theory of government, and the people will understand this as soon as the system is put into operation. If we were to consult our immediate convenience and comfort we would never oppose wrong of any kind, for all warfare involves a temporary sacrifice, but this is our of any kind, for all warfare involves a temporary sacrifice, but this is our government and must be transmitted unimpaired to posterity. We have no choice, therefore, but to stand steadfast, come what may.

Mayor Patterson appeared before Judge Winehester in the district court this afternoon. He asked for time to plead and to arrange for counsel to defend him. A great array of counsel and witnesses is expected to be present at the hearing, and it is said that sensational developments may be looked for.

City of Mexico, Dec. 26.—The reports telegraphed to the United States, Implying that Mexico is on the point of a financial panic, are exaggerated. Money, it is true, continues tight, but business houses are continuing to receive large orders from the interior for merchandise, machinery, etc., and excellent contracts in electrical lines are being made by firms in this city. Generally speaking, business has been good throughout the month.

The almost total absence of precipitation during the present month is assuming an alarming aspect, according to the weather bureau, and unless there is an unusual fall of snow or rain within the next month there will likely be a deficiency in the water supply for next year. The records of the weather bureau show that up to the present time there has been only about 01 of an inch of precipitation. This is far below the lowest record ever chronicled during this month since the establishment of the bureau in this place. The least amount of precipitation ever recorded here in December in previous years was .11 of an inch,

The Ralph E. Cumming Stock company, which opens the Grand on Jan. 7. is traveling west under circumstances somewhat unusual, not to say startling. They are rehearsing a play on a railroad car en route.

Manager Kallman and Mr. Cummings some time ago decided to make some changes in the original cast of the Cummings company and it was necessary to do some contracting by mail. This proved rather an unsatisfactory method for results. Although most of the members were in Chicago on time, there was some hitch in the start towards Salt Lake and both Manager Kallman and Mr. Cummings were out here. The latter became anxious and the early part of last week boarded a special car and left for Salt Lake and by the time the company reaches here to-morrow night the management expects every member to be well "up" in the part assigned.

Miss Douglas left San Francisco last evening and will arrive here in the morning. The members of the company who are already here have had their parts in hand for several days. Stage rehearsals are to begin next week.
